

Appl. No. 09/683,264
Amdt. dated April 20, 2006
Reply to Office Action of March 24, 2006

PATENT

REMARKS/ARGUMENTS

Please replace the original sequence listing and disk filed on January 13, 2006 with the enclosed substitute sequence listing in paper and computer readable format. In order to comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures, 37 C.F.R. §§ 1.821-1.825, Applicants submitted the first paper copy and computer readable format (CRF) of the Sequence Listing on January 13, 2006. The Raw Sequence Listing Error Report mailed March 24, 2006 requested further explanation of the artificial sequences disclosed in the sequence listing. The substitute sequence listing explains the artificial sequences.

This paper is accompanied by a CRF (floppy disk) containing SEQ ID NOS: 1-5, and a paper copy of the sequence information which has been printed from the CRF. The information contained in on the CRF was prepared through the use of the software program "PatentIn version 3.3" and is identical to that of the paper copy. This amendment contains no new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 650-326-2400.

Respectfully submitted,

Daniel Mao
